

## EFFLUENT TREATMENT FOR THE FOOD & DRINKS INDUSTRY

The Company's objective is to provide 'one stop' solutions for clients who require specialist effluent treatment services and equipment.

We design, supply and install the following:

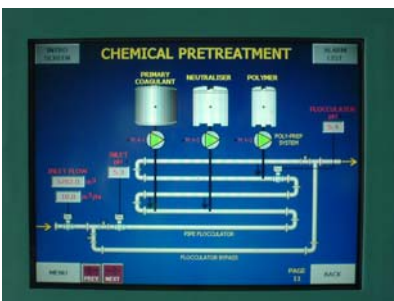

- Pumping stations
- Screens
- Chemical dosing systems
- Dissolved air flotation (DAF)
- Activated sludge plants
- Percolating filters
- Tertiary GAC/sand/UV
- Reed beds and wetlands

Also as part of the package we can provide:

- Site appraisals and pilot trials
- IPPC drainage surveys and site plans
- Equipment hire  
DAF/screens/pumps/samplers

Our wide range of process knowledge, together with the benefits of an experienced team of designers and engineers, means that we can find a solution to your effluent treatment problem.
